

MockMind AI

Professional Project Report

Introduction

MockMind AI is an AI-powered interview preparation and career readiness platform that helps students and job seekers improve interview performance through resume analysis, AI-based mock interviews, performance tracking, skill-gap analysis, and personalized career recommendations. The platform offers a professional and intuitive user experience while serving as a scalable foundation for future AI integration.

Procedure

1. Access the website.
2. Register or log in.
3. Upload a resume.
4. Review the generated resume analysis and ATS score.
5. Select the interview type and job role.
6. Complete the mock interview.
7. Review the performance report and recommendations.
8. Monitor progress from the dashboard.

Output

The system delivers a complete interview preparation workflow, including resume analysis, mock interview simulation, performance analytics, career recommendations, and interview history. The prototype demonstrates an end-to-end user experience suitable for academic presentations, hackathons, and future enhancement.

How MockMind AI Differs

- Unified platform for interview preparation and career readiness.
- AI-driven personalized feedback instead of generic practice questions.
- Integrated resume analysis, skill-gap analysis, and progress tracking.
- Professional, responsive, and user-friendly interface.
- Ready for integration with advanced AI services.
